Freelance UI/UX Designer

Being a freelance UI/UX Designer , I have added value to my clients by:
- Designing and developing responsive websites and mobile apps, incorporating user feedback, to improve the overall user experience.
- Conducting user research and usability testing to understand customer needs, and creating aesthetically pleasing designs of mobile applications. Implemented user centered design principles to ensure an intuitive and seamless user experience.
- Streaming the design process used various designing tools such as Figma, Adobe Creative Suite, Sketch and InVision.
- Meeting tight deadlines and delivering high-quality work on time, as demonstrated by a 95% on-time delivery rate.

Final Year Project

Pinpoint: Live Vehicle Tracking and Reservation web and mobile app
- Allow user to track vehicle live location and show estimated arrival time.
- Allow user to reserve vehicle by interacting with app
- Includes an admin dashboard to manage vehicles, reservations , make schedule and set routes of vehicles.
- Get location from driver's mobile with the help Google Map API.
- Limited users allowed to interact with app those having institute's credentials to ensure security.
- Used PostgreSQL database and Reacts and React Native to build web and mobile app.
- Made mobile and web interface designs using Figma and Adobe XD.

Academic Projects

Vehicle of Interest
- Designed, developed and deployed website using HTML, CSS and Bootstrap.
- Allow user to store information of vehicles and apply CRUD operations.
- Used PostgreSQL database to store vehicle's data.

Facegram
- Designed and developed web app using React JS as the front end and Node JS as the back end.
- Users can create and share posts (e.g. text, images, videos) with their followers.
- Users can send direct messages to each other within the app.

Volunteer Work

Regional Blood Center Sukkur: Blood Donation Camp
- Participated in blood donation camp as a blood donner.
